

**Product information** 

## **Charger SICO 5006**

Battery charger for NiCd and NiMH cells, type C (baby)

Recommended accessory for SICO 1214, SICO 2049 and PEGA 1211

## Data

Mains voltage:  $230 V \pm 10\%$ Suitable for battery type:  $2 \times NiMH / NiCd 1.2V / (2000 ... 4500)mAh$ Charge interrupt method: -DV, time Charge time: approx. 4h (2000 mAh) Dimensions:  $180 \times 140 \times 85$  mm Weight: approx. 1000 g

## Technology

- The Charger SICO 5006 is suitable for charging one or two nickel-cadmium batteries or nickel-metal hydrid batteries type C (baby) with 1.2 voltage.

- The charging process is monitored by a microcontroller. When the battery is completely charged, the charge current is switched off automatically.

- Irrespective of the charge and the power rating, each battery is monitored and switched off separately.

- The batteries can remain in the charger for any length of time, there is no risk of overcharging the battery.

- Before the batteries are charged, any remaining charge is discharged automatically.

## Delivery

- Charger SICO 5006
- Manual
- Acceptance test certificate 3.1 according BS EN 10204
